DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11, 13-16, 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Chaffey (G.B. Patent No. 2,102,661).

Chaffey discloses a connecting device for a spray boom to a chassis of an agriculture comprising:

- a single deformable quadrilateral 12/30/36/24 arranged in a plane which is substantially vertical and parallel to a longitudinal plane of the sprayer;
- a vertical mid-plane 24;
- an actuator 54 to deform the quadrilateral 12/30/36/24;
- a trapezium quadrilateral (figure 3);
- an upper arm 30; and
- a lower arm 36.

3. Claims 1-11, 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Boncser (G.B. Patent No. 2,098,841).

Boncser discloses a connecting device for a spray boom to a chassis of an agriculture comprising:

- a single deformable quadrilateral 14 arranged in a plane which is substantially vertical and parallel to a longitudinal plane of the sprayer;
- a vertical mid-plane;
- an actuator to deform the quadrilateral ;
- a trapezium quadrilateral (figure 2);
- an upper arm; and
- a lower arm.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Chaffey or Boncser in view of Tyler.

Either Chaffey or Boncser teaches all the limitations of the claims except for a self-propelled type sprayer. However, Tyler discloses a self-propelled type sprayer . Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Chaffey or Boncser with a self-propelled type sprayer as suggested by Tyler. Doing so would provide an effective sprayer.

Allowable Subject Matter

Art Unit: 3752

6. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a connecting device: Pederson et al., and Thompson al.
